SUMMARY

Software Developer with 3+ years of experience shipping production web and mobile applications. Frontend-focused with React, Next.js, and React Native, and comfortable across the stack — REST APIs, Supabase, Node.js, and cloud deployment. I take features from requirements through to a released product, and I write code that is tested, reviewable, and easy for the next developer to change.

WORK EXPERIENCE

Lead Software Developer XUREDEAL PTE. LTD.

San Juan City, Metro Manila · May 2025 – Present

- Own the frontend architecture for a collectibles marketplace shipped as two mobile apps (5K+ downloads) and a merchant dashboard used in production.
- Led junior developers and interns; set up code review and PR processes that kept delivery on schedule.
- Introduced Zustand and TanStack Query to replace ad-hoc data fetching, cutting redundant network calls.
- Shipped releases end to end — App Store, Google Play, and web on Vercel — on CI/CD pipelines that let the team release on demand.

Software Developer XUREDEAL PTE. LTD.

San Juan City, Metro Manila · Aug 2023 – May 2025

- Migrated the backend from AWS Amplify to a serverless Lambda API architecture, improving scalability and lowering operational overhead.
- Built the notification layer on a third-party email provider, automating auth and marketplace purchase confirmations.
- Integrated the frontend with the core database through REST APIs, cutting rework between design and engineering.
- Joined as a full-stack intern (Apr – Jul 2023): shipped a React Native CRUD app in two weeks and set up the initial AWS Amplify backend.

Independent Full-Stack Developer (Project-Based) Self-Employed

Caloocan City, Metro Manila · 2024 – Present

- Contracted to design and build specialised web applications for corporate clients, from requirements gathering through deployment.
- Built a responsive web platform for a local community organisation to run outreach and manage its digital presence.

TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, responsive and mobile-first design, REST API integration

State & Data: Zustand, TanStack Query, React hooks, Supabase, Firebase

Mobile: React Native, Expo

Backend & Cloud: Node.js, AWS (Lambda, Amplify), serverless, SQL, .NET, Vercel, CI/CD

Tools & Practices: Git, GitHub, pull requests and code review, Jira, Codemagic, Figma, Agile and Scrum, unit testing, CI/CD, App Store and Google Play release management

Projects: Xure / Xtore (React Native + Next.js, live bidding, order management), Y1 Portal (Next.js + Supabase, no-code landing editor), Snap Share (React + Supabase, real-time photo sharing)

EDUCATION

BET – Computer Engineering Technology
Technological University of the Philippines – Manila
2023

ICT – Mobile App and Web Development
STI Academic Center, Caloocan City
2019

CERTIFICATIONS

- ICT Computer Programming NC III — Java & .NET Technology (STI Academic Center)
- Advanced React (Meta / Coursera), Responsive Web Design and JavaScript Algorithms (freeCodeCamp)
